

Madhwaraj Kulkarni

AI Product Analyst | Scrum Master | Digital Transformation Specialist

Professional Summary

MBA Digital Transformation professional with 8+ months of hands-on experience in AI/ML product testing, quality assurance, and Agile project management. Proven ability to bridge technical AI capabilities with business requirements through systematic evaluation frameworks, automated testing workflows, and cross-functional team leadership. Currently advancing Scrum Master expertise with practical experience facilitating development teams and managing sprint activities.

Core Competencies: AI Product Analysis • Scrum Master Methodologies • Digital Transformation Strategy • Business Process Optimization • Stakeholder Management • Data-Driven Decision Making

Objective

As an MBA graduate with a strong foundation in business analytics and digital transformation, I am seeking an entry-level Business Analyst, Junior Scrum Master role where I can apply my skills in data analysis, process improvement, and problem-solving and team management to support business growth and contribute to decision-making processes

Professional Experience

VIT Infotech

AI/ML Product Analyst & Scrum Master (Trainee)

Pune, Maharashtra | January 2025 – Present

Roles and Responsibilities

AI Product Testing & Optimization:

- Designed and executed comprehensive AI chatbot evaluation framework for Bridge customer support bot (IntelliBuddies partnership), implementing automated quality assessment workflows using ChatGPT-based scoring mechanisms

- **Developed systematic quality metrics and performance monitoring processes** that streamlined AI product evaluation, reducing manual testing overhead while improving response quality consistency
- **Created user stories and comprehensive test plans** for Australian Dealer Management System client, enabling clear stakeholder communication and ensuring alignment between technical capabilities and business requirements
- **Managed end-to-end defect tracking and resolution workflow** using Taiga project management system, ensuring systematic categorization and prioritization of AI performance improvements

Scrum Master & Agile Leadership:

- **Facilitate daily scrum ceremonies** for cross-functional AI/ML development team, ensuring transparent communication, identifying impediments, and maintaining sprint velocity
- **Lead sprint planning and backlog management** activities, coordinating task prioritization and ensuring adherence to Agile methodologies throughout development cycles
- **Serve as primary liaison between development team and management**, providing regular progress reports, escalating blockers, and ensuring stakeholder alignment on project deliverables

Business Development & Strategy:

- **Developed go-to-market strategies and customer outreach campaigns** for RPA platform IntelliBuddies, including cold calling scripts and customer pitch materials
- **Conducted market research and competitive analysis** to support product positioning and business development initiatives

Enabling Fundamentals Pvt Ltd

Marketing Analyst (Intern)

Nashik, Maharashtra | July 2022- August 2022

Roles and Responsibilities

- Performed market research using tools like Google Trends to identify trends and customer demands in the product market
- Assisted in customer segmentation by geography and demographics to create data-driven product marketing strategies

- Developed content to promote Continuous Improvement and Kaizen initiatives within the organization
 - Responsible for speaking to contacts scraped through LinkedIn in Europe
-

PV Clean Mobility Technologies (JV of Vitesco Technologies, Germany)

Business Analyst Intern

Pune, Maharashtra | July 2021 – Sep 2021

- Conducted business diagnostics through root cause analysis to identify process inefficiencies and operational bottlenecks
 - Developed interactive dashboards using Power BI to provide data-driven insights and facilitate decision-making
 - Analyzed the manufacturing data lifecycle to optimize production processes and improve operational performance
 - Utilized ETL (Extract, Transform, and Load) processes to clean and transform raw manufacturing data for analysis
 - Prepared and analyzed FEM (Forecast, Execution & Monitoring) dashboard that helped management to identify which projects are achieving sales plan and which are falling short.
-

Education

Symbiosis International University

MBA Digital Transformation | June 2023- November 2025 | GPA: 6.18

Activities and Societies

- Awarded Best Volunteer Recognition for organizing ISG-ISRS National Symposium 2023
 - Active participant in Symbithon 2023 & 2024 (53km marathon events)
-

Christ University, Bangalore

BBA Business Analytics | August 2020- June 2023 | GPA: 8.2

Activities and Societies

- Department Core Team member for Analytics Event, Melange 2022
 - Led event marketing and registration coordination initiatives
 - Participated in Origo Best Management Team Event 2020
-

Key Projects & Initiatives

Speakeasy Public Speaking AI Bot (Entrepreneurial Venture)

Product Conceptualization & Market Validation | 2024-Present

- **Conceptualized and launched AI-powered public speaking improvement platform**, identifying market gap in personalized communication skills development
 - **Conducted comprehensive market validation** with early user feedback indicating strong demand for platform integration capabilities
 - **Secured initial pricing validation** from potential customers indicating willingness to pay ₹199-999 annually for solution access
 - **Driving product strategy and user experience design** while coordinating technical implementation resources
-

Manufacturing Process Optimization (PV Clean Mobility)

Dashboard creation and process optimization

- **Resolved critical waste management inefficiencies** in heavy machinery manufacturing through advanced data analysis and ETL process optimization
 - **Designed interactive Power BI dashboard** utilizing real-world manufacturing data to provide actionable operational insights
-

Traffic Management Solution (TRAF-FIX)

- **Developed mobile application concept** for real-time traffic jam alerts and route optimization
 - **Conducted market research and technical feasibility analysis** for traffic management solution implementation
-
